

SERRAPEPTASE^{Rx}

A Gift from the Silkworm

Nature's Prescription for Pain Free Living

SERRAPEPTASE^{Rx} is a special enteric coated preparation of Serrapeptase, a natural enzyme with powerful anti-inflammatory & pain reducing properties. It digests non-living tissue, blood clots, cysts, arterial plaque & inflammation in all forms.

Studies show that Serrapeptase can help:

- Arthritis, post operative swelling and other Inflammatory Diseases including Carpal Tunnel Syndrome, Breast Engorgement, Ulcerative Colitis, Crohn's Disease, Asthma, Bronchitis, Sinusitis, Multiple Sclerosis and Fibromyalgia.
- Reduce the recovery time of sprains and inflammation from sport related activities and injuries.
- Protect against stroke and accelerate the speed at which arterial plaque is removed (unlike cholesterol-blocking drugs, serrapeptase clears the avital tissue from the arterial wall without interfering with cholesterol synthesis).

Because of its effectiveness in such a wide range of applications, experts predict it will become the most useful nutritional supplement of all time.

Each capsule of **SERRAPEPTASE^{Rx}** contains 30,000 IU of Serratia Peptidase Enzyme, up to 300% higher than some other leading brands. With no known side effects, it is the most effective anti-inflammatory available.

SERRAPEPTASE^{Rx} and other quality **Enerex** products are available at fine health food stores and independent pharmacies across Canada.
